the modern world was not created by the civilization of renaissance italy the advent of the printing press or the marriage restrictions imposed by the medieval church rather it was widespread reading that brought about most of the cognitive psychological and social changes that we recognize as peculiarly modern david williams combines book and

communications history with readings of major works by petrarch bruni valla reuchlin erasmus foxe and milton to argue that expanding literacy in the renaissance was the impetus for modern civilization turning a culture of arid logic and religious ceremonialism into a world of individual readers who discovered a new form of communion in the act of reading it was not the theologians luther and calvin who first taught readers to become what they read but the biblical philologist erasmus who encountered the divine presence on every page of the gospels from this sacramental form of reading came other modes of humanist reading particularly in law history and classics leading to the birth of the nation state as literacy rates rose readers of all backgrounds gained and embodied the distinctly modern values of liberty free speech toleration individualism self determination and democratic institutions communion and community were linked performed in novel ways through revolutionary forms of reading in this conclusion to a quartet of books on media change williams makes a compelling case for readers and acts of reading as the true drivers of social political and cultural modernity and for digital media as its looming nemesis
